Newsletter

Dear All,

We like to thank you for being with us on this STEM educational journey for our kids. As promised in our previous newsletter, we are excited to share details on Africa Tech Week, Holidays Coding and Robotics Class as well as Afronovate coding competition.

Africa Tech Week

Over and above the participation by ATG CEO as one of the key speakers in this years' event, ATG has also expanded its participation by putting a programme that create awareness about the event while continuing with its mandate of enabling teaching and learning. It is on the backdrop of this thinking that we are notifying you about another planned event and activity for 2021.

Africa Teen Geeks is a strategic partner to Africa Tech Week to create a children programme in collaboration with UNICEF to expose kids aged 6-18 to the African tech eco-system, equip them with coding and app development skills, link them to mentors and inspire them to be Africa's next tech innovators and entrepreneurs. We would also like to welcome TopCo Media for partnering with us and for their significant participation and contribution in this initiative.

 5. Intro to Robotics basics advanced 1 May 5hours (08:00 – 13:00)
-

Africa Teen Author

We are proud to introduce to you one of our favorite Geeks from Michigan, USA Zara Burzo who is an ardent supporter of Africa Teen Geeks. Zara is an established young writer for children's books in several countries. She is currently working on a book where she puts together stories from children in different parts detailing how they see the impact of Covid-19.

All kids aged between **5-14** years old are encouraged to partake in this exciting project by clicking on [this link](#) or the button below.

General

The President announced at the Annual Basic Education Sector Lekgotla, that Coding and Robotics will soon be introduced in selected Primary schools. Africa Teen Geeks welcomes the news and commits to assisting young people with the skills they need to thrive in the Fourth Industrial Revolution.

Kind Regards,
The Africa Teen Geeks Team
