Dear ATG community

We hope that you and your families are well and keeping safe during these surreal times. As we start the second half of the year, the impact of Covid-19 continues to be felt, especially the harsh realities of the third wave aggravated by the delta variant. Despite these challenges and their impact on our planned initiatives, we continue to work hand-in-hand with our partners to fulfil our mandate of making STEM accessible to all children in South Africa.

As we usher into Mandela month, we would like to announce that ATG has planned initiatives where we will be partaking in activities geared at commemorating Nelson Mandela. Three important announcements are our strategic partnership with the University of Johannesburg (UJ), the Nelson Mandela Foundation and Software AG.

A flyer for a Teacher Training Workshop. The background is a photograph of a diverse group of people, some wearing face masks, in a classroom setting. A woman in the foreground has her hand raised. The text is overlaid on a red and orange geometric design.

UJ Teacher Workshop

The impact of Covid-19 on learners has necessitated support and innovative methods to help students understand and do well in their subjects. As such, the University of Johannesburg (UJ) Soweto Science Centre in partnership with the Department of Basic Education, Africa Teen Geeks and UNICEF have organised a Teacher Training workshop to equip teachers with the necessary skills to thrive in their online (or hybrid) classrooms, and to come up with new ways that keep students engaged. The workshop will be held at **10:00am on Saturday the 16th of July 2021** and is open to all teachers in South Africa and the rest of Africa.

Registration (link below) is required and the Zoom link will be sent to the registered teachers.

This Strategic Partnership has also seen the establishment of a national tutoring campaign. The campaign, led by Africa Teen Geeks and the UJ Department of Mathematics and Applied Mathematics, is aimed at preparing and equipping students with strategies to adequately and correctly answer question papers in the areas of Science, Technology, Engineering, and Maths (STEM). It will be running during the school holidays and every Saturday until the year-end final exams.

Nelson Mandela Foundation

It gives us great privilege and honour to announce ATG as a strategic partner supporting the Nelson Mandela Foundation on Mandela Day in action against poverty and foundation programmes for Education.

Each1Feed1 is a food distribution network programme championed by the Nelson Mandela Foundation that started at the beginning of the lockdown to support families who have been most affected by the challenges of food insecurity. Beneficiaries include child-headed households, orphaned families, and the elderly, people who are informally employed in the ECD workforce as well as people living with disabilities.

You can also help us help the vulnerable by donating canned food. Find the depot nearest to you by clicking on the link below

Adelaide Tambo School for the Physically Challenged, Coding and Robotics Lab establishment

To celebrate Mandela month and In honour of Africa's greatest sons, Madiba, Africa Teen Geeks, supported by the Nelson Mandela Foundation, will be donating 25 computers to Adelaide Tambo School for the Disabled in Soweto. Over and above the donation, we will ensure that the facility is utilised appropriately and optimally through our teacher development programme and the implementation of Coding and Robotics curriculum, as well as Advancing the STEM agenda.

We are hoping that this initiative will change the lives and shape the future of these learners by enhancing the quality of their education and their access to information.

Software AG team up with Africa Teen Geeks to build futuristic computer labs

We are excited to announce our strategic involvement and partnership with Software AG. Software AG is an enterprise software company that is involved in the integration, Internet of Things analytics, process software and services. In line with its CSI Strategy, Software AG is building 4IR Labs in various schools, and ATG will contribute in the partnership by ensuring that the facilities are utilized optimally through our teacher development programme, implementation of Coding and Robotics curriculum as well as advancing the STEM agenda in Hendrina and other areas.

The results are in! A massive thank you to all of you that submitted entries and also to all who viewed, bumped, commented, and generally been supportive. **Thank You!**

... and the winners are:

Foundation Phase (Grade R-3)

1st Kaylee

2nd S Govender

Intermediate Phase (Grade 4-6)

1st Asteri

2nd JMG

Senior Phase (Grade 7-9)

1st Wndsor

2nd Nerds

3rd Car game

FET Phase (Grade 10-12)

1st Telepathic

2nd Woos

3rd Deepdevs

General

We would like to thank all learners, parents/guardians and staff for your fantastic support. Please continue to visit our website and our social media platforms for further valuable information.

Kind Regards,

Africa Teen Geeks Team
